

地球温暖化時代におけるウォーターフロント再生: オーストラリアと日本からの学び

Repairing Waterfronts in the Age of Global Warming: Learning from Australia and Japan

国際シンポジウム/ウェビナー

24 November 2022

2022年11月24日(木)

International Symposium

The symposium intends to foster knowledge exchange and share different approaches while detecting and interpreting the threats and opportunities that waterfront cities in Australia, Japan and elsewhere on the planet face in a period of climate change and high sea-levels threats. Various participants will promote knowledge exchange and share different approaches while detecting and interpreting the challenges and opportunities that waterfront cities face in a period of climate change and high sea-levels threats through a cross-cultural comparison between Australia and Japan design and planning methodologies.

Through a cross-cultural comparison involving

Australian, Japanese, and overseas urban design and planning methodologies, the various participants will promote intercultural awareness and dialogue, and share interdisciplinary perspectives to address the many challenges faced by urban waterfronts in the 21st Century.

Reviewing case studies from Australia, Japan and overseas, the symposium aims to explore urban design strategies that address infrastructure improvement, waterfront revitalization and redevelopment, and disaster mitigation caused by the sea level rise/flooding risks while utilizing this environmental threat as an opportunity to bring back the waterfront to residents and raise their awareness towards climate change.

Webinar via Zoom

AM Session: 9.30am-12.15pm (Australian Eastern Standard Time)
7.30am-10.15pm (Japan Standard Time)

Carola Hein

Helen Lockhead

Raffaele Pernice

Shaowen Wang

PM Session: 2.00pm-4.30pm (Australian Eastern Standard Time)
12.00pm-2.30pm (Japan Standard Time)

Tetsuya Yaguchi

Ryoko Iwase

William Galloway

George Kurumado
